Access Floor:

MFS 1000 All Steel with Cementitious Infill Panels (Bare)

Understructure:

Rigid Grid Bolted Stringer

Floor Height (mm):

450 (Finishes– carpet/Nora rubber flooring)

Project Description

In 2016, the new Australian International School Early Learning Village for pre-schoolers was completed. The campus features classroom playgrounds, dance studio, interactive library and carpeted open play spaces that span across the 7 floors of the campus.

Microtac Systems was engaged to provide the access floors and floor finishes for the project. With our access floor system, we were proud to be able to provide a safe and conducive learning environment for the children.
