

Singapore University of Technology and Design

8 Somapah Road

Project Information

Client: Singapore University of Technology and Design (SUTD)

Architect: UNstudio and DP Architects

Development Type: School Campus

Project Size (sqm): 1,514

Year Completed: 2014

Product Description

Access Floor:

Microtac MFS 800 All Steel with Cementitious Infill Panels (Bare Panels and HPL Finish)

Understructure:

Cornerlock and Rigid Grid Bolted Structure

Floor Height (mm):

150 and 675

Project Description

The Singapore University of Technology and Design (SUTD) is the fourth autonomous university established in Singapore. With its unique design and modern green features, the campus is highly sustainable and facilitates interaction among the student body, staff and community.

Microtac Systems was selected to provide and install the access floor system for the Innovative Digital Arts (IDiA) labs, security, sound control room and the data centre in the campus. After much consultation, we were able to recommend a suitable floor system for the different rooms that would achieve superior structural and acoustic performance and help to foster a more interactive learning environment for the students.
