Product Description

Access Floor:

MFS 1500 All Steel with
Cementitious Infill Panels
(HPL)

Understructure:

Rigid Grid Bolted Stringer

Floor Height (mm):

900

Project Description

The development is a purpose-built data centre. Microtac Systems was engaged to provide and install the access floors for 4 levels that span approximately 6,000 sqm.

Throughout the project phase, we were able to demonstrate our value in understanding the client's requirement and provide the appropriate access floor system. Furthermore, we were able to execute the installation in an expeditious manner and completed the project within the scheduled timeline.
